PARTS LIST

- 1 Turn off the Toilet Tank water supply
Flush the toilet to empty the tank

Shut off the water supply

- 2 Remove the toilet seat by unscrewing the toilet seat bolts from the hinges.

- 3 **Install Bidet attachment on toilet**

Place bidet attachment on the toilet so the tube is as close to the back of the toilet bowl as it will go.

Make sure the adjustable boards line up with the toilet holes.
You may need to slip the adjustable boards accordingly to line up properly.

For Right hand use

For left hand use

- 4 Replace the toilet seat on top of bidet attachment.
Make sure to tighten so that the bidet attachment and seat do not move.

- 5 a) Disconnect the water supply hose from the water supply valve.

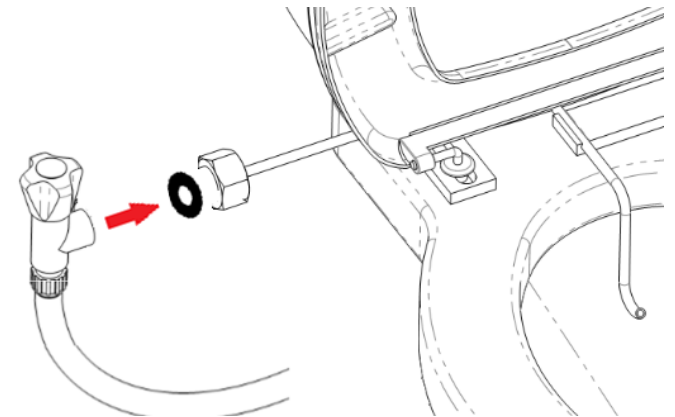

- b) Connect T-valve to the water supply valve on the wall and ensure the rubber washer is properly seated

- c) Connect water supply hose under the toilet tank to the remaining open side of the T - valve

- 6 Insert the rubber washer into the nut and screw the valve on the nut

- 7 Open the main water supply valve slowly and check for leaks.

To clean the bidet attachment, use a soft cloth and mild cleaner. Do not scrub or use harsh, abrasive products which may Scratch the product.
